THE UNITS THAT SET THE STANDARD IN HIGH PRODUCTION ABRASIVE BLASTING AND VACUUMING

S series

The patented cleaning system achieves levels of grit cleanliness that are unparalleled in the industry. The S Series Super Units have blasted more square feet of steel than any other recycling unit in history.

- 6,200 or 5,500 CFM 28" High Vacuum
- Eight Nozzle Continuous Blasting System
- Up to 80 Barrels of Abrasive Storage
- Dual Air Drying System with Desiccant Dryers
- Six Component Cleaning System
- Six Stage Air Wash with Separate Bag House

- 6,200 or 5,500 CFM 28" High Vacuum
- Six Nozzle Continuous Blasting System
- 60 Barrels of Abrasive Storage
- Dual Air Drying System with Desiccant Dryers
- Six Component Cleaning System
- Six Stage Air Wash with Separate Bag House

- 3,800 or 5,500 CFM 28" High Vacuum
- Four or Six Nozzle Continuous Blasting System
- 42 Barrels of Abrasive Storage
- Oversized 4" Air Drying System with Desiccant Dryer
- Six Component Cleaning System
- Six Stage Air Wash with Separate Bag House

- 2,600 CFM 28" High Vacuum
- Two or Four Nozzle Continuous Blasting System
- 20 Barrels of Abrasive Storage
- 3" Air Drying System with Desiccant Dryer
- Five Component Cleaning System
- Six Stage Air Wash with Separate Bag House

HEAVY DUTY, HIGH PRODUCTION ABRASIVE BLASTING UNITS IN A COMPACT SIZE

C series

Our C Series offers all the versatility, features, and quality you expect. Purpose built for blasting and power-tool work.

- Heavy Duty
- 3,800 CFM, 28" High Vacuum
- Four Nozzle Continuous Blasting
- Twenty-five Barrels of Clean Grit Storage
- 4" Air Drying System with Desiccant Dryer

- 2,600 CFM, 28" High Vacuum
- Two or Four Nozzle Continuous Blasting
- Fifteen Barrels of Clean Grit Storage
- 3" Air Drying System with Desiccant Dryer

- 2,600 CFM, 28" High Vacuum
- Four Nozzle Continuous Blasting
- Eleven Barrels of Clean Grit Storage
- 3" Air Drying System with Desiccant Dryer

- 1,200 CFM, 28" High Vacuum
- Two Nozzle Continuous Blasting
- Five Barrels of Clean Grit Storage
- Complete Air Drying System with Desiccant Dryer
- Multiple Power Tool Operation

STACKABLE INTERMODAL ARS RECYCLING SYSTEMS

Purpose built for the stringent demands of the marine industry.

CE Certified Intermodal units specifically designed for fast paced, high production environments. Internal stairs, not ladders, provide access to the upper components. Heavy duty construction allows for unit to stay up and running with little or no downtime. The patented cleaning system achieves levels of grit cleanliness that are unparalleled in the industry. Systems of 2, 4, or 8 blast nozzle configurations are available.

RDT / RDU

Rapid deployment trucks and trailers for cleaning and painting of bridges with aluminum grated work deck platforms. Safely support blasters and painters while the hydraulic powered augers remove abrasive debris.

VT5200 (VacTrailer)

Self contained, stand alone vacuum trailer that can assist your recycling units during long vacuum retrievals. The VT5200 can be used separately to vacuum directly into its own holding tank.

THE GOLD STANDARD IN MOBILE DUST COLLECTION

DC series Dust Collectors

Our "low-drag" design places the greatest air flow at the end of the dust collection hose. With a minimized footprint and rugged construction, it thrives in the harshest environments.

- 9,000 CFM @ 14" wg
- 2 @ 20" Rear Inlets
- Class "C" Spark Resistant Fan
- Diesel or Electric
- Fork Pockets

- 20,000 CFM @ 16" wg
- 20' Trailer
- 2 @ 20" Rear Inlets
- Class "C" Spark Resistant Fan
- Diesel or Electric

- 28,000 CFM @ 16" wg
- 20' Trailer
- 2 @ 20" Rear Inlets
- Class "C" Spark Resistant Fan
- Diesel or Electric

- 45,000 CFM @ 13" wg
- 28' Trailer
- 6 @ 20" Inlets
- Class "C" Spark Resistant Fan
- Diesel or Electric

- 60,000 CFM @ 13" wg
- 7 @ 20" Inlets
- Dual Wheel Fan
- Class "C" Spark Resistant
- Diesel or Electric

- 5,000 CFM @ 16" wg
- 21' Trailer
- 2 @ 10" Rear Inlets
- Elevated Work Deck
- Patent Pending Fold and Lock Mobility

ARS

Parts & Service

The unparalleled quality of ARS equipment is matched with world class customer service and support.

Our modern facilities include 24,000 sq. ft. of heavy fabricating and assembly areas including four 10-ton overhead cranes.

- An expanded parts department insures that critical parts and components will always be in stock.
- Our service department is supported by four fully equipped service vehicles.
- Staff of qualified service technicians can troubleshoot over the phone 24/7.
- With a simple phone call, we will dispatch an experienced service technician promptly to your site.
